EXPERIENCE

Anblicks | *SDE-2*

June. 2024 – Present

- Developed and maintained a Car Dealer Management System for leading automobile companies, streamlining dealership operations and customer management.
- Implemented end-to-end modules as per business requirements using React and Ext JS, while ensuring timely delivery and collaboration with cross-functional teams.
- Led migration from older to newer versions of Ext JS and React, enhancing performance, maintainability, and alignment with modern development standards.
- Built modular, reusable UI components and optimized frontend code to reduce duplication, improve maintainability, and support scalable growth.
- Transformed design mockups into responsive, user-friendly interfaces by closely collaborating with backend developers and UI/UX designers.

Webocult Technologies | *Junior Software Developer*

Aug. 2022 – May 2024

- Built a Hospitality Management System to streamline restaurant workflows and enhance user experience.
- Implemented auth-based routing and real-time updates via sockets for seamless UX.
- Improved app performance by refactoring key modules using lazy loading and optimized state handling.
- Customized UI with Taiga UI, Daisy UI, Material UI, Tailwind, and Bootstrap for design consistency.

Codeflash Infotech | *Software Developer Intern*

May 2022 – July 2022

- Built and maintained responsive web apps using React, JavaScript, and jQuery.
- Implemented UI designs into clean, user-centric interfaces aligned with branding.

PROJECTS

Klimate – Weather App | *Next.js, React, TanStack Query, Tailwind CSS, TypeScript, Shadcn UI, Recharts*

- Developed a modern weather application with search functionality and dynamic weather display for any location.
- Visualized data using interactive charts with Recharts and managed server state via TanStack Query.
- Built a responsive, theme-switchable UI using Shadcn UI and Tailwind CSS with full TypeScript support.
- Implemented seamless client-server rendering and fast load times using Next.js SSR/SSG capabilities.

Signature Generator | *HTML, CSS, JavaScript*

- Built an interactive web app that allows users to draw and customize digital signatures.
- Implemented features like text and background color pickers, dynamic font size control, and undo/clear functionality.
- Enabled users to download signatures as images and provided a smooth drawing experience using the native canvas API.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, Ext JS, Tailwind CSS, Shadcn, Bootstrap, jQuery, Material UI

Backend: Node.js, Express.js, MongoDB, SQL, REST APIs, Socket.IO

Programming Languages: JavaScript, TypeScript, Python, C++, C

State Management & Libraries: Redux, RxJS

DevOps, Deployment & Tooling: Firebase, Vercel, GitHub, GitLab, Sentry, Postman, Jest

EDUCATION

Gujarat Technological University

2019-23

B.Tech in Computer Engineering

CGPA: 8.54/10
