EXPERIENCE

Anblicks | *Software Engineer*

June 2024 – Present

- Designed and developed scalable enterprise web applications by implementing end-to-end business workflows across inventory, sales, financing, pricing, taxation, rebates, and customer management modules using Angular, React, TypeScript, and RESTful APIs.
- Engineered reusable component architecture, configurable business modules, shared UI libraries, and dynamic form frameworks, improving maintainability and accelerating feature delivery across multiple applications.
- Built high-performance, data-intensive applications with server-side pagination, advanced filtering, reporting, validation, and optimized RESTful API integration for large enterprise datasets.
- Contributed to application modernization by migrating legacy AngularJS applications to Angular, supporting microfrontend architecture, debugging production issues, and optimizing application performance.

Webocult Technologies | *Software Developer*

Aug 2022 – May 2024

- Developed scalable, responsive web applications for the hospitality domain using React, Next.js, TypeScript, RESTful APIs, and Socket.IO to support POS, order management, reservations, and customer engagement workflows.
- Built reusable component architecture, authentication workflows, custom hooks, and modular frontend solutions with RESTful API integration, improving maintainability and accelerating feature delivery.
- Optimized application performance by implementing lazy loading, code splitting, efficient state management, and real-time communication using Socket.IO, delivering high-performance user experiences.

PROFESSIONAL PROJECTS

Advent – Enterprise Dealer Management System | *React, TypeScript, Redux, REST APIs*

- Developed an enterprise-grade Dealer Management System supporting end-to-end dealership operations across inventory, vehicle sales, financing, taxation, rebates, pricing, and delivery workflows for automotive retailers.
- Designed scalable, reusable component architecture with configurable business modules, dynamic forms, role-based workflows, and seamless RESTful API integration to support complex enterprise applications.
- Implemented high-performance data management using server-side pagination, advanced filtering, reporting, validations, and performance optimization for large-scale enterprise datasets.

Eatcard – Hospitality Management Platform | *Angular, TypeScript, Socket.IO, REST APIs*

- Developed a cloud-based hospitality management platform supporting POS, order management, reservations, kitchen operations, billing, and customer engagement for restaurants.
- Built responsive, reusable web applications with modular component architecture, authentication workflows, shared services, and seamless RESTful API integration to streamline business operations.
- Implemented real-time communication using Socket.IO with lazy loading, modular architecture, and performance optimization to deliver scalable, high-performance web applications.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++

Frontend Technologies: React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, RxJS

Backend, APIs & Databases: Node.js, Express.js, RESTful APIs, PostgreSQL, MySQL, MongoDB, Firebase, Supabase, JWT Authentication

Cloud, DevOps & Engineering: AWS, Docker, Git, GitHub, Bitbucket, Postman, Vite, Webpack, CI/CD, JIRA, Microfrontends, System Design, Design Patterns, Performance Optimization, SSR, Agile

EDUCATION

IIIT - Bangalore

2025 - Present

Post Graduate Program in Data Science & AI

Gujarat Technological University

2019 - 2023

B.Tech in Computer Engineering

CGPA: 8.54/10
